Chapter 1

Product Overview

1.1 Product Purpose

Our mission for this project is to centralize and modernize the management of the semestral football tournament through a digital platform that organizes logistics, communication, and data efficiently.

1.2 Product Vision

The vision of TECHCUP FÚTBOL is to become the official and trusted digital platform for academic sports tournaments, transforming informal processes into structured, transparent, and technology-driven experiences.

1.3 Core Values

Our values align with offering an effective, easy, and manageable system that allows students and teachers to register teams while providing a unified platform capable of managing large sets of data in a friendly and structured way.

1.4 Brand Personality

TECHCUP FÚTBOL represents:

- Organization and transparency
- Competitive and respectful spirit
- Academic community engagement
- Technological efficiency
- Dynamic and modern interaction

Chapter 2

Logo System

2.1 Primary Logo

2.2 Logo Concept and Meaning

The logo represents a soccer cup partially built from binary numbers (0s and 1s). This symbolizes the combination of sports and technology: players give their best on the field, while the platform ensures effective planning and logistics.

The red and blue reflect the traditional duality of soccer competition while also referencing the institutional colors of the university.

2.3 Logo Usage Guidelines

The logo must:

- Maintain its original proportions
- Not be distorted or stretched
- Not be recolored outside the official palette
- Be placed on backgrounds that ensure sufficient contrast

Chapter 3

Color System

3.1 Primary Colors

Oxblood

HEX: #990000
RGB: 153, 0, 0

Cool Sky

HEX: #48ACF0
RGB: 72, 172, 240

White

HEX: #FFFFFF
RGB: 255, 255, 255

3.2 Secondary Colors

Pale Sky

HEX: #CCDDE2
RGB: 204, 221, 226

Deep Space Blue

HEX: #153243
RGB: 21, 50, 67

3.3 Color Rationale

We chose this color palette as blue and red are frequently used in the context of sports, more specifically soccer. The predominant color will be Oxblood, which is the exact same tone of red the university uses. Also, the use of secondary colors give out a formal but not overwhelming sense of style, suggesting an appropriate contrast from the red tone.

Chapter 4

Typography System

4.1 Typeface System

The platform uses a clean sans-serif type system to ensure clarity, accessibility, and modern aesthetics across digital interfaces.

Heading Example

TECHCUP FÚTBOL
Tournament Dashboard
Upcoming Matches

Body Text Example

This is an example of body text used within the TECHCUP FÚTBOL platform. It ensures readability when displaying match schedules, team statistics, and registration information.

4.2 Typography Hierarchy

- H1 – Main Titles (Bold, Large)
- H2 – Section Titles (Bold)
- H3 – Subsections (Regular weight)
- Body Text – Regular
- Captions and Labels – Smaller size

Chapter 5

Visual and Interface Style

5.1 Imagery Style

In order to have a platform that should visually communicate organization, competitiveness, and clarity, we took into account the following elements.

The images used along the platform will be based on minimalism, as the idea is to center the platform on the textual data given, rather than showing lots of information from images only. However, it is to consider that minimalism does not convey incomplete or basic forms of expression but rather professional and practical ways of complementing the information given in the platform.

Also, many images will be taken at the university as this is our main audience, along with a small amount of pictures taken from the Internet but keeping the aesthetic previously described.

5.2 User Interface Consistency

Buttons, forms, tables, and status indicators must follow the official color system and typography rules to ensure a unified digital experience. We understand that a huge variety of types of buttons, shapes and colors are not always the best option for a platform used by a wide range of people: this is why we use a limited amount of shapes, buttons and element interfaces to keep consistency throughout the platform.

Chapter 6

Applications and Mockups

6.1 Platform Interface

Mockups are made with Figma website. Also, class diagramas are made with Astah, and other additional diagrams will be made with Lucidchart.

In this link, you will find the project Mockup.

Figma Mockup

6.2 Additional Visual Applications

Future visual requirements and diagrams will be documented here.

Chapter 7

Tone of Voice and Communication

TECHCUP FÚTBOL communication should be:

- Clear and direct
- Friendly but professional
- Transparent in system messages
- Structured and informative

TECHCUP FÚTBOL communication should not be:

- Overly technical
- Multilingual within the same interface
- Overloaded with unnecessary information
